Technologies: React.js, Nextjs, Typescript, Bootstrap CSS, Tailwind CSS, Sass, Heroku, Netlify

PROJECTS

Ravebooking - Frontend Developer

JUNE 2023 - PRESENT

Ravebooking is to develop a hotel listing and booking platform that allows hotel owners to list their hotels and enables users to book accommodations.

- Connect hotel owners and guests by creating a platform for property listings and user bookings based on preferences.
- Streamline the booking process with a user-friendly interface for searching, viewing, and securing reservations.
- Provide comprehensive hotel information, including amenities, pricing, and reviews, for informed decisions.
- Ensure secure payment processing and prompt commission for hotel owners through integrated gateways.
- Develop an efficient dashboard for hotel owners to manage listings and bookings.
- Foster trust and credibility with a professional and visually appealing interface.
- Enhance the user experience with intuitive design and fast performance.
- Optimize platform performance for scalability and high volumes of bookings.
- Promote user reviews and ratings for transparency and guidance.

- Generate revenue through a reliable commission collection and distribution system.

Technologies: Nextjs, Typescript, Chakra (React Library), Rest API

Ecojobz - Frontend Developer

OCTOBER 2022- JANUARY 2023

Ecojobz is a job board for tech ranging from product design, front-end development, backend development, data science e.t.c

- Developed a Next.js-based user interface for a visually pleasing user experience.
- Implemented a secure authentication system with registration, login, and logout features.
- Integrated RESTful APIs for efficient frontend-backend communication.
- Designed an intuitive and user-friendly UI to optimize user engagement.
- Created a responsive and dynamic interface using Next.js.
- It showcased front-end development skills in delivering a polished application.

Technologies: Nextjs, Mantine (React Library), Rest API

Credit Fast - Frontend Developer

JULY 2022 - JANUARY 2022

Credit Fast empowers users with versatile financial capabilities, enabling them to effortlessly fund their wallets, seamlessly transfer funds, and conveniently withdraw from their wallets as needed.

- Crafted the entire user interface using React.js to ensure a user-friendly and engaging experience.
- Expertly implemented essential authentication features, including user registration, login, and logout functionality.
- Seamlessly integrated RESTful APIs to enable efficient communication between the frontend and backend components.
- Successfully integrated a robust payment gateway provider, Flutterwave, to facilitate secure and seamless transactions, enhancing the platform's payment processing capabilities.

Technologies: Reactjs, Tailwind CSS, Rest API
